EDUCATION

Bachelor in Computer Science & Engineering (Hons.)

Lovely Professional University

Jul 2019 – Jul 2023

CGPA: 8.35/10

Senior Secondary

Bal Vikas Vidyalaya

Apr 2017 - Mar 2018

Percentage: 79.4 %

High School

Children's Garden School

Apr 2015 - Mar 2016

CGPA: 10/10

EXPERIENCE

LeadSquared

Bangalore, KA

SDE Intern

05/2022 – 05/2023

- Developed and maintained backend APIs using .NET and JavaScript, resolving bugs and improving system reliability.

IXRLabs Learning Solutions Private Limited

Jaipur, Rajasthan

Jr. Unity Developer

06/2023 – 09/2023

- Developed and optimized AI-powered VR modules using Unity3D and C#, delivering immersive simulations, virtual labs, and interactive 3D experiences across engineering, medical, and science domains.
- Focused on enhancing practical learning by transforming theoretical concepts into hands-on, engaging VR environments.

Safety Circle India Pvt Ltd

Chandigarh, PB

Unity Developer

09/2023 – 12/2024

- Designed and developed VR applications for safety training, using Unity3D and C# to create interactive, high-impact learning experiences while optimizing performance across multiple VR hardware platforms.
- Implemented game mechanics, AI algorithms, scripting, and level design for both 2D and 3D projects, ensuring engaging gameplay, efficient functionality, and scalable application architecture.

V4C Solutions Pvt Ltd

Bangalore, KA

Senior Unity Developer - Contract with HAL

12/2024 – 04/2025

- Developed cutting-edge virtual reality (VR) simulations for **LCA-Tejas** aircraft maintenance, focusing on the installation and removal of various components, and incorporated assessment tools to track and evaluate progress, designed for training personnel in the **Indian Air Force**.
- Converted operator manuals and standard operating procedures (SOPs) into interactive virtual reality simulators, improving learning engagement and operational readiness.

Simpencil Private Limited

Bangalore, KA

Senior Unity Developer

06/2025 – now

- Developed and implemented **no-code simulation modules** for VR/MR training in aerospace, naval and land operations, enabling quick deployment of training environments.
- Developed and integrated backend APIs to store assessment data, including scores and progress tracking, ensuring seamless data management.

PORTFOLIO

- Worked on diverse client projects developing 2D, 3D, and VR games, with attached video links showcasing gameplay, key features, and my contributions to creating engaging, interactive experiences.

SKILLS

Programming Languages & Coding: - C++, C#, Python, Data Structures & Algorithms, Problem Solving

Immersive & Game Development: - Unity 2D/3D, Cocos Creator, Virtual Reality (VR), Augmented Reality (AR).

Web & Backend Development: - ASP.NET, PHP, HTML, CSS, JavaScript.

Database & Tools: - SQL, DBMS, Git, API Integration, Debugging
